

FOR IMMEDIATE RELEASE

AutoFarm® ParaDyme™ System Installation Kits Fit Over 400 Different Farm Vehicles

FREMONT, CA – April 2, 2010 – The new AutoFarm ParaDyme GPS System now offers Installation Kits to accommodate over 400 different models of tractors, sprayers, spreaders, combines and swathers.

ParaDyme is now installable on virtually all brands of farm machinery, with the most recent additions of tractor install kits, including hydraulic and steer-by-wire kits, being for 12 models in the Deere 9000 and 8000 Series tractors. ParaDyme is compatible with all of the following brands:

Tractors	Deere, Case IH, New Holland, AGCO, Cat, Challenger, Massey Ferguson
Combines	Deere, Case, New Holland
Sprayers	Deere, Case, AGCO
Swathers	MacDon

As John Bressler, Senior Marketing Manager at AutoFarm says, “AutoFarm is truly ‘color blind’ when it comes to installing new ParaDyme on the various brands of farm machinery. We will reach the 500 mark on vehicle install kits soon, because we have more and more coming every week. Our extensive list of hydraulic and steer-by-wire installation kits is key to AutoFarm being one of North America’s most popular aftermarket GPS systems.”

The ParaDyme System is the industry’s first single system solution to all facets of precision farming: planter control, application control, yield monitoring, data logging and management, plus hands-free GPS steering via WAAS, EGNOS, OmniSTAR HP/XP, and RTK. It is also GLONASS ready. Plus, with its unique factory-integrated wireless, ParaDyme offers a Remote Real-Time Service connection to the dealer in addition to optional RTK ReadyConnect that provides RTK correction without a base station.
